KEMMLIT® for the highest demands

Washroom facilities are the visiting card of every property. With KEMMLIT's creative and well-defined systems, room solutions can be designed according to the requirements of the property in question.

Our clear commitment to the highest quality products, handling and service have made us market leader.

For more than five decades we have offered our customers consistently outstanding and innovative solutions. We combine solidity, innovation and a flair for design with the very latest in production technology. As a result, KEMMLIT has received many awards and prizes in the last few years.

The strictest quality controls and an eye for aesthetically pleasing and balanced proportions guarantee washroom facilities to the very highest standards.

We carry out extensive functional and wear tests in our laboratory, and every single product is subjected to a painstaking final inspection. The brilliant quality of our washroom facilities and accessories is no accident, but the result of our overarching philosophy of quality, as attested to by Germany's Technical Control Board (TÜV).

Whichever KEMMLIT products you choose, you can depend on its product and design quality for years to come. Our range of accessories for public conveniences also consistently pursues this philosophy.

Inox Line | stainless steel accessories

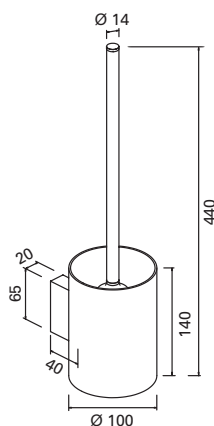

perfect in design and function

Outstanding architecture begins with the work on the details. The accessory systems from KEMMLIT are the result of this mindset.

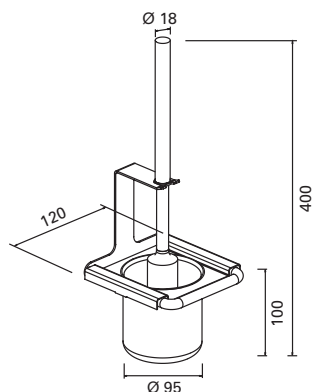

The Inox Line is only available from KEMMLIT and is designed to perfectly complement KEMMLIT cubicle systems with stainless steel head rail, supporting legs and fittings, giving public conveniences an exclusive design throughout.

The stainless steel used by KEMMLIT has very high resistance to atmospheric corrosion. Its surfaces are polished smooth and non-porous, making it very hygienic and ensuring permanent brilliance.

The invisible screw fastening is part of the design, and also protects against theft and vandalism.

lockable,
finely brushed stainless steel
for approx. 500 paper towels
No. 551 12

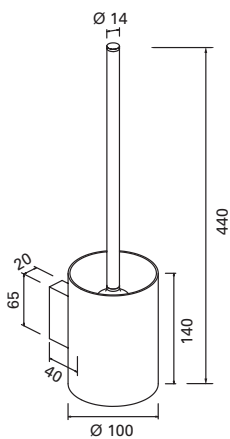

Alu Line | aluminium accessories exclusive and high-grade

Aluminium is the height of fashion – its strength, resistance to damp and wet, and its low weight has seen increasing use of the metal in buildings. Design-focused planners and builders are making more use of it in its anodised form to make your ideas come true!

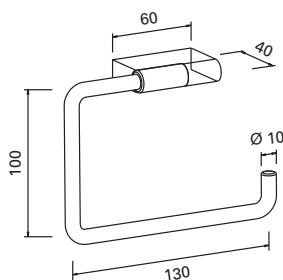

Alu Line is exclusively available from KEMMLIT and was developed together with architects. The accessory range is perfectly coordinated with the KEMMLIT cubicle system and other sanitary products in colour, form and function.

The design is reduced to the barest minimum – elegant, linear, aesthetically pleasing and functional. The anodised surface is perfectly finished, long-lasting and easy to clean.

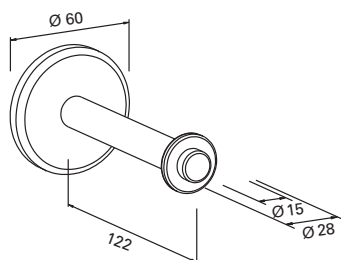

The overall construction, strength and the quality of the material of every accessory are designed for permanent functionality. Outstanding quality means years of trouble-free operation. The invisible screw fastening prevents theft with the added advantage of not detracting from the design.

No. 403 08

Value Line | nylon accessories

brilliant colours and sturdy

Varied colour concepts that stand out are an important element of professional building and sanitary facility planning in today's world. The coordinated KEMMLIT colours open the way to many and varied design opportunities. The Value Line is available in eight colours – one colour throughout the entire product range!

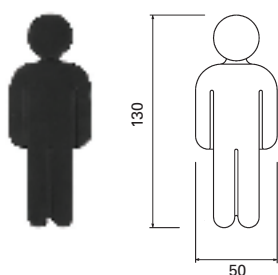

The high-gloss surfaces with extremely high wear resistance also provide excellent protection against most chemicals, cleaning agents and disinfectants.

The superior characteristics of nylon (polyamide) have led to its use in many different areas of daily life and technology. Excellent thermal and mechanical qualities – breakproof, sturdy and temperature-resistant – give the material a long life.

Environmentally friendly nylon is non-fading, 100% hygienic, suitable for food and completely recyclable. There is absolutely no build-up of static charge.

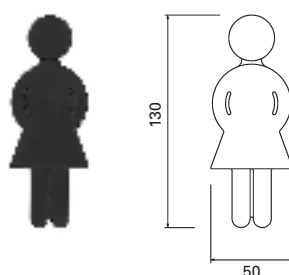

The hidden mounting in the Value Line range protects against vandalism and theft.

Value Line – in colour, form and function perfectly coordinated with KEMMLIT cubicle systems with coloured walls and doors, and anodised and coloured profiles, edges, fittings and supporting legs.

The “small” difference

Planning and assembly | we're there when you need us

Partition and accessories make the system!

Keep in mind a uniform concept for your washroom facilities right from the start of planning. The materials, surfaces and colours of the accessories are coordinated with the KEMMLIT cubicle system down to the last detail. The entire KEMMLIT product range stands for perfect design and high quality throughout.

Mounting technology

You should leave the assembly of high-value accessories to the professionals. Besides special glues for glass etc., and mounting aids matched to the materials, the right tools and proper handling make all the difference. KEMMLIT cubicle systems integrate special wall reinforcements and cores that ensure permanent and vandalproof use of the accessories.

Guarantee

KEMMLIT provides a general guarantee on its cubicle systems and accessories. The guarantee expires if installation is carried out by third parties. Requirements for masonry walls and partitions made of glass, HPL, wood products or metal panelling vary enormously. Professional assembly protects against subsequent damage. Damage to tiles or partitions with screw holes may result in guarantee problems.

Economic

Besides design and quality the KEMMLIT accessory range also produces real economic benefits. For one thing, assembly of accessories is usually included in the price of a partition. This is performed by professionally trained KEMMLIT technicians at the same time as the partitions are put up. This greatly reduces coordination work for builders.

Spare parts

Vandalism, theft and wear and tear. Missing parts can be supplied quickly and easily for years to come. To preserve the overall look of the cubicles, existing screw layouts can be used by replacement parts. This means that in most cases you will not need to reinstall entire partition elements.

Tailored solutions

We can also build to your specifications. Talk to your personal KEMMLIT advisor to explore the design and technical options at your disposal. He'll be happy to fill you in on all the details.

Colour concept | up-to-date and versatile

There's virtually no limit to the colour combinations at your fingertips! Colours and surfaces are perfectly coordinated with the KEMMLIT cubicle systems and other washroom products.
